## PRO-CUT RELEASES NEW FIXED-POST TROLLEY

West Lebanon, NH

AS our CTO Chris Greenwald says, "If excellent design goes unnoticed because it so seamlessly meshes with the needs of the operator, then we think our new fixed-post trolley is effectively invisible."

Pro-Cut's initial design focus was to create a trolley that would be able to host our GYR command center. The fixed post provides just such a home. The carriage unit that allows greater ease and range of motion, and the low profile 4-wheeled base that meshes improved stability and maneuvering, is icing on the cake.

If you've got a Pro-Cut brake lathe we strongly encourage you to take a look at this new simple, elegant, and highly functional trolley.

"It's always fun to start with a new challenge and a blank canvas. I had a lot of room to play with on this project and am really pleased with the finished product," says Dan Bloom, Designer.

**Pro-Cut International** is the world leader in on-car brake lathes. The company is located in West Lebanon, NH.

**For more information** visit [www.procutusa.com](http://www.procutusa.com) or contact Jeff Hastings @ 800-543-6618, Ext. 103.

Pro-Cut's new fixed-post trolley is easy to maneuver and allows for easy upgrade to GYR computer technology.
