FOR IMMEDIATE RELEASE: October 1, 2011

Pro-Cut's latest Reach Extension Plate (50-1492) expands the range of vehicles that can be serviced with their on-car lathes to include medium-duty trucks.

## NEW 50-1492 REACH EXTENSION PLATE ALLOWS FOR MACHINING ON MEDIUM-DUTY TRUCKS

West Lebanon, NH

Pro-Cut continues to expand the range of vehicles that can be serviced with their on-car lathes to now include F650, F750, and Workhorse chassis motor homes. This latest addition comes with the introduction of the 50-1492 Reach Extension Plate that is easily added or removed between the lathe and cutting head to give the extra reach needed to service these medium-duty trucks.

"It's a great solution for anyone needing to service this class of truck where rotors are extremely expensive and often difficult to remove. The plate provides the means to turn the most challenging vehicles in the industry into your biggest profit opportunities; it's a great investment for any shop that sees bigger trucks," says Geoff Womer, Product Manager.

**Pro-Cut International** is the world leader in on-car brake lathes. The company is located in West Lebanon, NH.
