## HONDA CANADA DESIGNATES THE PRO-CUT GYR-COMPATIBLE AS THEIR RECOMMENDED ON-CAR LATHE

West Lebanon, NH

Honda Canada has made the Pro-Cut GYR Compatible their Recommended on-car brake lathe for the corporation. The full GYR on-car brake lathe will become an Essential Tool for Honda Canada dealers in early 2011. This new on-car brake lathe system will operate on the Tablet/Server wireless platform already installed at Honda Canada dealerships.

The Pro-Cut GYR lathe insures that only necessary brake parts are replaced and that every vehicle is repaired to OEM specifications. Additionally, physical vehicle data and critical brake measurements are recorded and can be transmitted wirelessly for use by Honda Warranty, Engineering, and Customer Satisfaction.

"The GYR is really a natural fit for Honda Canada. Their eTech system already directs the technician and captures data points for general service. We were able to integrate the GYR software into their platform so the same instruction and reporting will now be available for their brake service," says Gary Pilbosian, head of OEM development of GYR.

**Pro-Cut International** is the world leader in on-car brake lathes. The company is located in West Lebanon, NH.
