

You balance wheels. You match rotors.

# NEWS

FOR IMMEDIATE RELEASE: 6/15/09

PRO-CUT's LATEST:

**GYR vbs** *validated brake service*

Pro-Cut GYR vbs is a complete brake repair system that directs a technician to make in-spec brake repairs and then captures the finished condition of each serviced rotor.

For the first time, customers, national service chains, and OEMs have a way of directing and confirming the quality of every brake repair job.

## JAGUAR/LAND ROVER APPROVE PRO-CUT

West Lebanon, NH

After extensive evaluations **Jaguar/Land Rover** have approved and now recommend the Pro-Cut on-car brake lathe for use in the dealers for warranty service. This policy shift is worldwide.

The Pro-Cut on-car brake lathe is a recommended tool for Jaguar workshops and is now available on the SPX Service Portal, accessed through GTR. Got to: <http://www.spxtools-shop.com/>

"This is an exciting policy shift as it's worldwide and a real departure from Jaguar's former policy," said International sales manager Dwight O'Hara. In the past, Jaguar treated brakes not as a repairable component but as consumables where parts were only replaced. Our engineers were able to show them the value of matching rotors — a value both in the economics and in engineering."

**Pro-Cut International** is the world leader in on-car brake lathes. The company is located in West Lebanon, NH.
