Pro-Cut's latest model — the **PFM 9.2 DRO-Live** On-Car Brake Lathe

## PRO-CUT ON-CAR LATHES NAMED RECOMMENDED TOOL BY MITSUBISHI

Mitsubishi Motor Sales of America recently named the Pro-Cut PFM on-car brake lathe, featuring hub-mounted technology, a recommended tool for all Mitsubishi dealers in the U.S. Until now, Mitsubishi had recommended only the caliper-mount on-car lathe.

"Mitsubishi was one of the last hold-outs for the caliper-mount technology" said Pro-Cut VP National Accounts, Bruce Prince. "I think trends in the market and dealer sentiment made it an easy decision in the end. Many Mitsubishi dealers were already using Pro-Cut."

Mitsubishi joins fellow Japanese automakers Toyota and Nissan in recommending the Pro-Cut.

Pro-Cut International is the world leader in on-car brake lathes. The company is located in West Lebanon, NH.
