Wyotech Partners with Pro-Cut to Offer National Training

West Lebanon, NH

Pro-Cut recently partnered with **Wyotech**, one of the largest training schools in the automotive technology industry. With locations from California to Florida, Wyotech educates hundreds of students annually. With Pro-Cut in their curriculum, easy access to local Pro-Cut representatives and support from Pro-Cut headquarters, Wyotech students receive the highest-quality training in rotor matching.

Each Wyotech facility in the U.S. is now a **TrainSMART** location. TrainSMART is Pro-Cut's nationwide training and certification program in rotor matching. In partnering as a TrainSMART location, Wyotech allows the Pro-Cut rep to come to the school to provide both classroom instruction and hands-on training of the on-car brake lathe. Wyotech has offered access to classrooms as well as shop bays to ensure that TrainSMART attendees receive hands-on training in a professional shop environment.

"We are very pleased to partner with Wyotech to bring top-quality training in rotor matching to prospective technicians, and to shops looking to increase efficiency, profits, and quality of brake-service work." —Bruce Prince, VP Sales
