Suzuki Mandates Pro-Cut in Mexico

West Lebanon, NH

Suzuki of Mexico has released a bulletin stating that by September 2013, all Suzuki dealers in Mexico must have the Pro-Cut on-car brake lathe. Pro-Cut's Mexican distributor, Rodolfo Alcocer, has worked diligently with Suzuki of Mexico to help them appreciate the value of rotor matching.

Suzuki recognizes that Pro-Cut's Rotor Matching Systems offer the highest-quality brake job by matching the rotor directly to the hub with precision, accuracy, and speed. Rotor matching virtually eliminates lateral runout (reducing runout to less than .002"), eliminates the possibility of brake pedal pulsation, and reduces comebacks — while saving techs significant time.

Pro-Cut will be attending the Suzuki dealers convention in February to present the lathe to all dealers.

"We are very excited to be working closely with Suzuki to ensure the best possible brake job on every vehicle," said Dwight O'Hara, VP-Export.
