TATA MOTORS APPROVES PRO-CUT

West Lebanon, NH

After extensive evaluations Tata Motors of India has approved and recommended the Pro-Cut on-car brake lathe for use by their dealerships in India. The recommendation comes after months of evaluation. Pro-Cut is the first and only on-car lathe approved by Tata.

The Pro-Cut lathe has been added to Tata's equipment catalog and is available for purchase through that program. "This is an exciting time for Tata and Pro-Cut. We are looking forward to partnering and pioneering with them and beginning to grow Pro-Cut's presence in India," said Dwight O'Hara, VP-Export.

Pro-Cut's India distributor, Equipmasters, was instrumental in securing the approval. "The team at Equipmasters has done an exceptional job of introducing the Pro-Cut technology to the India market," said O'Hara. "Neither Pro-Cut nor on-car machining had any exposure in the market so they have really been starting from scratch."

PRO-CUT INTERNATIONAL is the world leader in rotor matching systems. The company is located in West Lebanon, NH.
