TrainSMART Certifies its 5,000th Rotor Matching Technician in First Year

West Lebanon, NH

Pro-Cut initiated TrainSMART, Pro-Cut's nationwide training and certification program, in 2013. **Since that time over 5,000 techs have completed online basic training and earned "Rotor Matching Technician" certification.**

TrainSMART is a two-step training program. The first step is an online course and exam. Technicians who take and pass this course receive a ROTOR MATCHING TECHNICIAN certificate and magnet for their toolbox. Completion of the online course is required before attending the hands-on portion of the training, which is held either onsite at the shop, or at one of the more than 35 training centers that have been established across the USA. Completion of the onsite training earns a tech PRO-CUT MASTER TECH certification.

"Hitting the 5,000th trained technician at such an early date has really confirmed for us both the quality of the program and the demand for training," said Geoff Womer, Pro-Cut's VP-Product and Marketing. "As the Pro-Cut lathe has become one of the most profitable pieces of equipment in today's brake service shop, techs — and shop owners — are recognizing the long-term value of training in rotor matching."

For information, access to the on-line course, and map showing onsite training centers go to: www.procutusa.com/trainsmart.aspx
