PRO-CUT LAUNCHES EXPANDED ONLINE TRAINING PROGRAM

West Lebanon, NH

Pro-Cut now offers complete on-line training for techs to master the Pro-Cut lathe and rotor matching. Once the tech completes training and passes the test, a certificate is automatically generated.

"The web has really moved into the shop these days and training methods that weren't possible even five years ago have become the most effective and convenient way to reach technicians," said Product Manager and Online Test Manager Geoff Womer. "We see this as a pre-screening to insure that techs have a baseline understanding of brakes, lathes, and the Pro-Cut Rotor Matching System **before** we show up for on-site training. When this step is completed, the lathe can speak for itself and everyone wins — Pro-Cut, the tech, and the shop owner. Our online training module helps our partnerships to flourish."

Pro-Cut **requires** completion and passing of online test before providing on-site training. Go to:
