Pro-Cut's latest model — the **PFM 9.2 DRO-Live** On-Car Brake Lathe

## ON-CAR LATHE NOW MANDATORY FOR CHRYSLER, DODGE, AND JEEP

DaimlerChrysler recently released warranty bulletin D-08-01 which mandates the use of an approved on-car brake lathe for warranty brake service performed by their Chrysler, Dodge and Jeep dealers. Previously, DaimlerChrysler had recommended but not mandated the use of on-car lathes. All Pro-Cut on-car lathe models had been previously approved by DaimlerChrysler.

"DaimlerChrysler's bulletin sends a clear message to both dealers and shops that perform brake service," said Pro-Cut Product Manager, Geoff Womer. "If you're going to fix brakes efficiently, accurately, and simply, you need an on-car lathe."

Pro-Cut International markets the Pro-Cut series of on-car brake lathes including the PFM 9.0 and PFM 9.2. The company is located in West Lebanon, NH.
