Pro-Cut's latest model, the **PFM 9.2SL On-Car Brake Lathe**, is among the lathes approved by DCX in their recent warranty bulletin.

## DCX APPROVES PRO-CUT ON-CAR LATHES FOR WARRANTY SERVICE

All current Pro-Cut lathe models are listed in DaimlerChrysler Corporation's (DCX) recently released warranty bulletin **D-07-10**, requiring dealers to use a proper on-vehicle lathe to receive warranty-claims payments for brake rotor refacing. "This warranty policy sends a clear message to the dealer base that Daimler-Chrysler is serious about the quality of their brake service, and that a Pro-Cut lathe is one of the best means for meeting their quality standards," said Pro-Cut's VP Sales, Bruce Prince. Since 1996, Pro-Cut has been cited repeatedly as a preferred piece of equipment for DCX dealers.
