Volkswagen approved Pro-Cut's latest model, the **PFM 9.2SL On-Car Brake Lathe**, in their recent warranty service bulletin.

VW RECOMMENDS PRO-CUT ON-CAR LATHES FOR WARRANTY SERVICE

Volkswagen of America's (VWoA) recently released Technical Service Bulletin **46 07 03** names Pro-Cut among the on-car lathes approved to perform warranty service. The policy recommends replacing rotors on warranty service performed within 6,000 miles or 6 months, but allows the use of select on-car lathes to perform warranty service after this threshold. "Volkswagen was one of the last brands distributed in the US that hadn't embraced the Pro-Cut and on-car machining. We were able to show that replacement doesn't get to the root of the problem—runout in the rotor—like the Pro-Cut can," said Pro-Cut's VP Sales, Bruce Prince.
