Pro-Cut's latest model — the **PFM 9.2 DRO-Live** On-Car Brake Lathe

## HONDA CANADA APPROVES PRO-CUT ON-CAR LATHES FOR WARRANTY SERVICE

Honda Canada recently released tools bulletin number II-3-07 which names the Pro-Cut PFM 9.0 and 9.2 models as approved for warranty service. In explaining the policy change, Honda Canada noted that rotor run-out tolerances on Honda vehicles have been reduced from 0.1 mm to 0.04 mm (about 0.0025" to 0.001"). In-house evaluations determined that Pro-Cut equipment could help dealers meet these new, tighter specifications when performing brake service.

"We really appreciate the trust Honda has put in our company and our equipment," said Pro-Cut VP Sales, Bruce Prince.

Pro-Cut International markets the Pro-Cut series of on-car brake lathes including the PFM 9.0 and PFM 9.2. The company is located in West Lebanon, NH.
