WARNING: USE ONLY PRO-CUT TIPS!

Pro-Cut OEM cutting bits have been specifically designed and tested to optimize the performance of Pro-Cut on-car brake lathes. Failure to use these OEM cutting bits will have a detrimental effect on lathe performance and could void warranty coverage.

- 1) All OEM's who approved the Pro-Cut on-car brake lathes did so using Pro-Cut tips.
- 2) The cutting tip is the single point between the lathe and the rotor — a critical piece of the rotor matching equation. It makes good sense to use what's been tested and proved.
- 3) Pro-Cut tips are a good all-around tip; they can be used on all of the rotors on today's passenger cars and trucks.
- 4) Manufacturers' rotor finish specification is achieved with the Pro-Cut cutting tip.
- 5) Extensive testing and man hours are involved with the cutting tips that we offer.
- 6) Pro-Cut is not partnered with any other tip distributor.

Contact the Pro-Cut Service Department at 800.543.6618, Prompt #2, with any questions.

PRO-CUT INTERNATIONAL is the world leader in rotor matching systems and on-car brake lathes. The company is located in West Lebanon, NH.
