● 50-660 TOOL BOX ASSEMBLY

▲ The PFM 9.2 lathe and trolley system with Accessory Basket helps you stay organized by keeping your tools within reach.

Announcing the all new user Tool Kit for ALL Pro-Cut lathes.

The **50-660 Tool Box Assembly** is handsomely outfitted in a clear plastic box that matches the existing Lug Nut Tool Kit in appearance and dimensions. This revised 50-660 kit contains the following tools:

- 6mm Allen t-handle wrench with logo
- chip brush to keep the machine clear of chips
- 2mm Allen for gib adjustment and cutting tip screws
- yellow crayon for indexing the rotor once it has been matched to the vehicle
- 6 and 8 mm open ended wrench with logo for gib adjustment on newer lathes, and flange adjustment screws on the VBG.

The **PFM 9.0** comes with both 50-660 Tool Kit and the newer 50-179 Lug Nut Kit, but NOT with the 50-1057 Basket. The **PFM 9.2 SL** will be shipped with BOTH Tool Kits and the basket.

The **50-660 Tool Box Assembly Kit** is standard issue with any new lathe package. The kits are also available separately.

The **50-660 Tool Box Assembly Kit** fits nicely in the 50-1057 4-bay Accessory Basket in the two narrow slots.
